## GREECE WILL NOT OPPOSE WISHES OF THE ALLIES

BUT IN MEANTIME AUSTRO-GERMANS HAVE SERBS ALMOST FINISHED

London, Nov. 26.—Cordial relations between Greece and the entente powers have been established with the Greek government's assurances that no attempt will be made to interfere with the allied troops should they under any contingency be forced to cross the Greek frontier and that, as heretofore, railway and other facilities will be afforded them.

That the assurances and the guarantees are satisfactory to the allies is shown in the fact that Greek grain ships which had been held up at Malta have been allowed to proceed to their destinations, relieving what would have been a very serious shortage of bread supplies if their detention had been prolonged.

It is understood that the allies also have promised Greece a monetary indemnity after the war for any damage which might be done through the occupation of Greek territory.

With this thorny question out of the way, the British public has centered its interest upon the attitude of Rumania and the intervention of Russia. It is well established that Russia has concentrated a great army near the Rumanian frontier, and dispatches state that a large number of heavy guns have arrived at Odessa from Japan for its use. However, the direction in which this army will move will be dictated by the policy the Rumanian government adopts.

Berlin shows some uneasiness, but beyond that and the statement of the Rumanian premier, M. Bratiano, that the relations between Russia and Rumania were never better, there is nothing to go on.

As a result of the success of the Austro-Germans and Bulgarians in gaining command of the Kosovo plateau, the Serbian government has moved to Scutari, while the army is defending the little fringe of Serbia which lies between the Sittica river and the Albanian and Montenegrin frontiers. It can be provisioned from Scutari, from which place the Montenegrins built good roads during their occupation.

Monastir is still in the possession of the Serbians, but the Bulgarians are pushing toward it, while the army of General von Gallwitz is reported to be on the way down the Vardar valley to help the Bulgarians attack the Anglo-French forces.

Heavy cannonading continues on the eastern front, winter has put a stop to any big movements on the eastern front, while the Italians are persisting in their offensive and are daily getting nearer Gorizia, across the Issonzo, and Rovereto and Riva, in the Trentino.

JOE THOMPSON WOULD ELIMINATE THE NEGRO VOTE

(CONTINUED FROM PAGE ONE) that would adjust the state election laws to suit his taste. The following from the Durant News discusses the questions of illiteracy test and registration, and quotes the plan of Congressman Thompson:

When the legislature finally meets and takes up the question of a law to take the place of the grandfather clause which was knocked out by the supreme court of the United States, it faces a problem of import and must begin at the very bottom of the question.

There is now a literacy test in Oklahoma as to the qualifications of a person to vote. There are no tests of this or cognate character. That a general literacy test and a grand registration law might have some effect here to eliminate the negro voter is believed by some of the party leaders who have been considering the question.

It is apparent, however, that there

is considerable sentiment among the thinking Democrats for an automatic test in the voting that shall be governed by laws which make it necessary for the voter to know how to vote before his ballot shall be registered.

Congressman Joe Thompson, of Pauls Valley, would discard all party emblems on the ballot and abandon all provisions in the election law for voting straight tickets. He would make up the ballots by parties and head each with plain type with the name of the party, making no distinction in the appearance of the candidates. The voter would be required to mark in front of the name of each candidate he desired to vote for. The test would be rubric. If the voter could read he would be able to vote for the men he wanted to see elected. If he could not vote he would mutilate his ticket or mark it minutely. This sort of a ballot with restrictions as to assistance in the polling places would make for a fair election without favor as to race or other conditions.
